Round beautiful patterned semi precious gemstones. Jasper is from the chalcedony/quartz group. It is a micro crystalline variety of quartz that contains up to 20% foreign material. These materials are what determine the color and appearance of the stone. Also because of the foreign materials, jasper is rarely uniform in color, it is usually multicolored, striped, and/or spotted. Mix these stones with silver, glass or other items of your favourites and you will get a beautiful handmade jewelry full of life.

Measurements: 10 mm hole appr. 1.6 mm

Package of: 1 strand appr. 38-40 cm with estimated 40 stones

Material: Semiprecious gemstone

Color: [Röd](#)

Please note! This is a natural product and that small blemish may be present. The number stones is estimated and can sometimes vary.
